Neko Neko no Mi

Magic Item

One Piece Edition

Neko Neko no Mi

Devil Fruit, very rare (unawakened) or legendary (awakened) — requires attunement

The Neko Neko no Mi, Model: Leopard resembles the head of a leopard, complete with spots and ears, and a curled, green T-shaped stem. Upon consuming this fruit, the user gains the ability to transform into a leopard and a leopard-human hybrid at will, gaining the natural strengths of a leopard: tremendous physical power, speed, agility, stealth, enhanced senses, and superior climbing and jumping ability.

Weakness. As with all devil fruits, the Neko Neko no Mi, Model: Leopard imparts a significant weakness to the sea. The user loses all their powers and becomes unable to swim, sinking like a stone if submerged in seawater.

Devil Fruit Save DC. 8 + proficiency bonus + Dexterity modifier

Human Form

While in human form, the user of the Neko Neko no Mi gains the following passive abilities:

Keen Smell. The user has advantage on Wisdom (Perception) checks that rely on smell.

Predator's Awareness. The user gains advantage on Wisdom (Perception) checks made to track or notice creatures they have seen within the last 24 hours.

Feline Poise. The user gains a +2 bonus to initiative rolls.

Hybrid Form

As an action, the user transforms into a humanoid leopard hybrid. In this form, the user gains:

Physical Enhancements. +2 to Strength and Dexterity, and advantage on Dexterity (Stealth) checks. Your walking speed increases by 10 feet.

Natural Weapons. The user gains claws and a bite. Claws deal 1d8 slashing damage, and the bite deals 1d6 piercing damage. These attacks count as magical for the purpose of overcoming resistance and immunity to non-magical attacks and damage.

Pounce. If the user moves at least 20 feet straight toward a creature right before hitting it with a claw attack, the target must succeed on a Strength saving throw against the Devil Fruit Save DC or be knocked prone. If the target is prone, the user can take a bonus action to make one bite attack against it.

Climber's Instinct. The user gains a climbing speed equal to their walking speed.

The hybrid form can be used a number of times equal to your Dexterity Modifier.

Full Leopard Form

Bestial Mobility. The user's walking speed becomes 50 feet, and they retain their climbing speed.

the bite deals 1d8 piercing damage. These attacks count as magical for the purpose of overcoming resistance and immunity to non-magical attacks and damage.

"He came in during the lunch rush, huge grin, way too much confidence, and asked for a glass of milk. Not with a meal, just the milk. I thought it was odd, but I've learned not to question customers in this line of work."
